uSee

uSee is Arteco's **VSaaS** solution, a cloud-managed web platform for the unified control of your security system.

A VMS developed for **maximum ease of use** and easy event management: compatible with all cameras and detection sensors, accessible anywhere, at any time and **from any device** connected to the internet.

uSee is a service that satisfies any needs: from On-premise systems to Hybrid Cloud systems, you can rely on a cutting-edge platform, always up-to-date and cybersecure.

Access from any device

Ease of integration

Scalable and multi-site

Cybersecure

arteco

uSee

The UNIQUE advantages of uSee

1 Usable from **any device**

2 **Instant creation** of events and automations

3 Unique features such as **video analytics with AI**, Forensic Search, target tracking and tagging

4 An open, ONVIF®-certified platform that is **interoperable with all security and video analytics devices**

5 Chat and video calls with other users for **sharing information and interventions**

6 Support, **updates and periodic check-ups** always included

7 A **cyber-secure** and **always updated** system

If your goal is the maximum operability of your VMS, **uSee** is the right choice for you.

THIS AND MUCH MORE IN A SINGLE FEE-BASED SOLUTION
