

FORENSIC SEARCH

Cut investigation time from minutes to seconds. Only on uSee

ONVIF

Compatible with ALL
ONVIF M-compliant cameras

No vendor lock-in

Included for all
uSee customers

When every second matters, uSee gives you the power to search faster, smarter, and without limits. Introducing **Forensic Search, only on uSee.**

What makes it different?

Instant search

Search for people or vehicles using visual filters like color, belongings, or vehicle type.

No setup needed

Forget predefined rules. Start any investigation with just a few clicks-even after the event occurred.

AI-powered efficiency

Let metadata do the heavy lifting with automated object recognition and smart filtering.

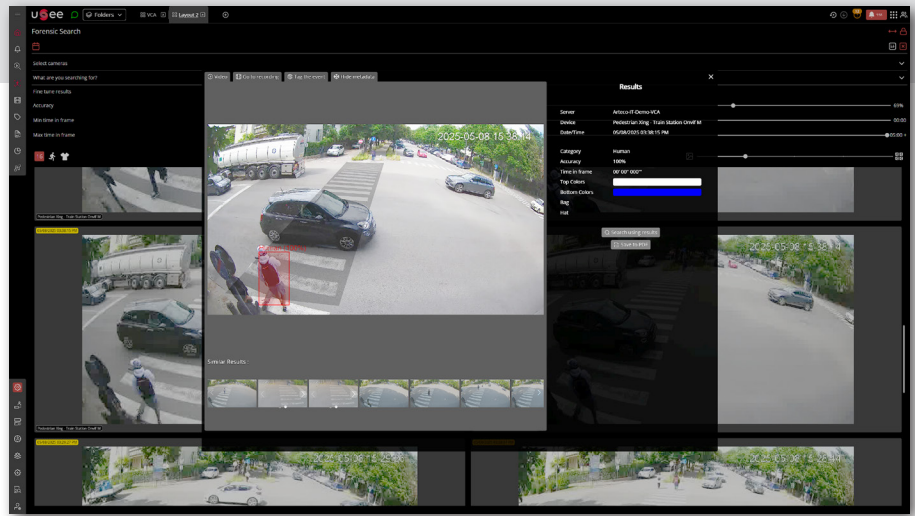

Region of Interest

Focus your search on specific areas in the frame to narrow down results even faster.

All-in-one and built-in

No external tools. No hidden costs. Just open your uSee dashboard and start investigating.

EXPLORE SMARTER

Smart Filters

Search for objects by type (person, car, motorcycle...) or attributes (clothing color, accessories, vehicle color).

Tailored Search Parameters

Apply detailed filters to instantly surface relevant results and eliminate visual noise.

High Precision

Reduce manual footage review and focus only on what really matters.

METADATA-POWERED INSIGHTS

Visual Content Analysis

Use snapshots or frame previews to trigger new searches for visually similar results.

Similarity Exploration

Quickly identify recurring elements or behaviors across different video segments.

Centralized Storage

All your data is saved securely and made instantly accessible in uSee's flexible architecture.

Designed for any scale

Whether you're managing a retail shop, securing critical infrastructure, or overseeing an entire city network, **uSee Forensic Search** delivers unmatched investigative speed, clarity, and flexibility.

Ready to rethink your video investigations?
