ARTECO GLOBAL announces the integration of its VEMS with the Samsung Techwin SNF-7010 360° camera

FAENZA, Italy – ARTECO GLOBAL, the leader in Video Event Management Software (VEMS) for the Security Industry, is pleased to announce that it has completely integrated the Arteco LOGIC Next Suite with the Samsung Techwin SNF-7010 360° panoramic camera.

The integration is part of an ongoing technological partnership relationship between the two companies. Arteco and Samsung Techwin have a partnership which began in 2010 with the integration of the Arteco VEMS and Samsung's most famous camera models, including most recently the Wisenet III series.

Thanks to the new integration, the Arteco Suite now supports the fisheye camera dewarping function to cover wide angle surveillance with situational awareness without blind spots. The captured original video from the Samsung cameras can be displayed in real time or in recorded playback from the same video source with Arteco's flexible and easy-to-use layouts including the 360° full panoramic view, 180° dual view, quad views and more. For both original view and de-warped video modes, users can utilize the intuitive dewarping control to easily pan, tilt and zoom on selected areas to focus on a region of interest, configure privacy zones, and apply video analytics, even using multiple angles.

Both companies are keen to continue their relationship based on a technical partnership as this has led to increased worldwide corporate visibility and market penetration for both. According to Arteco CEO, Giampaolo Sabbatani, "the integration of Arteco's VMS with Samsung's cameras provides the marketplace with a completely streamlined turnkey solution based on complementary functionalities to guarantee maximum performance even in critical situations".

"Arteco provides us with another important VMS integration for one of our most interesting IP cameras" according to Italian country manager, Fabio Andreoni of Samsung Techwin. "Now we can open the door to a whole new world of business opportunities for all of our partners, providing them with simple and immediate access to the SNF-7010 camera, one of our most promising products which has already grown successfully in the marketplace."

About Arteco Global Founded in 1987, ARTECO is a global provider of Video Security products based in Faenza, Italy with US operations in St. Louis, MO. With a focus on Ease of Use and Resource Management, Arteco's Research and Development principles have united world-class

video analytics and video management software on a single-platform at competitive price-points to standard Video Management Software (VMS) products. Arteco views Video Analytics as an enhancement to the video security experience and not as a costly addition or complication to standard video management. Arteco products are available through their dedicated team of certified Integrator Partners around the world, including the United States, Italy, South Africa, Poland, and Canada.
