### **Arteco partners with Canon to deliver streamlined and cost-effective security solutions**

FAENZA, Italy – Arteco Global, leader in the field of Video Event Management Software (VEMS) in the Security industry, is proud to announce a new partnership with Canon Europe, world leader in imaging solutions.. The agreement, announced at Security Essen, will provide a powerful VMS offering and make Canon’s entire range of high-quality network security cameras available to Arteco’s customers.

Arteco has required a hardware partner that was easily adaptable and complemented the flexibility of its features to provide security solutions for all business sizes; from small businesses, to enterprise security operations. Arteco selected Canon as a partner due to its reputation within the security industry and the strength and ergonomics of its network camera product line.

Arteco’s security package will be enhanced by integrating with Canon’s full portfolio, offering superior image resolution, even in areas of low light, and a wide field of vision. The collaboration will extend Canon’s reach into a wider market and provide customers with an ideal package to suit their surveillance needs across a number of key verticals including business parks, schools, hospitals, regional utilities, manufacturing, warehousing and hotels.

Arteco’s VEMS simplifies the third-party integration process and is compatible with a wide range of input and output devices, meaning the security system can be extended to incorporate monitoring of a range of actions, such as opening gates and closing doors. A streamlined user interface will also help users to clearly monitor and identify critical and key events, such as trespassing and perimeter protection.

“We are extremely thrilled with the opportunity of partnering with Canon Europe by integrating their high quality cameras with our competitive, cutting-edge VEMS, Artec Logic NEXT. Our technology partnership with Canon USA has been very successful and has provided us with the initiative to approach Canon Europe. The quality of Canon’s IP camera offering, its worldwide distribution, combined with its professional salesforce and consolidated reputation, make the company an ideal partner for our strategic offering to clients and partners alike around the world.”

Julian Rutland, Planning and Strategy Director, Canon Europe, says, “Working with key partners to provide tailored security solutions and adapting them to meet the needs of our customers is central to our strategy. We are extremely pleased to announce our partnership with Artec which will see us combine a simple, flexible and cost effective security option, offering a complete package for advanced video event management.”

**About Artec Global** Founded in 1987, ARTECO is a global provider of Video Security products based in Faenza, Italy with US operations in St. Louis, MO. With a focus on Ease of Use and Event Resource Management, Artec’s Research and Development principles have united world-class video analytics and video management software on a single-platform at competitive price-points to standard Video Management Software (VMS) products. Artec views Video Analytics as an enhancement to the video security experience and not as a costly addition or complication to standard video management. Artec products are available through their dedicated team of certified Integrator Partners around the world, including the United States, Italy, South Africa, Poland, and Canada. **About Canon Europe** Canon Europe the regional sales and marketing operation for Canon Inc., represented in 116 countries and employing over 11,000 people across Europe, the Middle East and Africa (EMEA).

Founded in 1937 with the specific goal of making the best quality camera available to customers, Canon’s tireless passion for the Power of Image has since extended its technology into many other markets and has established it as a world leader in both consumer and business imaging solutions. Its solutions comprise products, ranging from digital compact and SLR cameras, through broadcast lenses and portable X-ray machines, to multi-function and production printers, all supported by a range of value added services.

Canon invests heavily in R&D to deliver the richest and most innovative products and services to satisfy customers' creative needs. From amateur photographers to professional print companies, Canon enables each customer to realise their own passion for image.

Canon's corporate philosophy is Kyosei – 'living and working together for the common good'. In EMEA, Canon Europe pursues sustainable business growth, focusing on reducing its own environmental impact and supporting customers to reduce theirs using Canon's products, solutions and services. Canon has achieved global certification to ISO 14001, demonstrating a world-class environmental management standard.
