

uSee Service Suite

EVOLVE YOUR SECURITY

uSee Service Suite (uSS) is the new and innovative **CORE ENGINE** of uSee.

A software platform that **integrates** and **manages** all functionalities and devices dedicated to video surveillance and security.

A **revolutionary** and **customizable** solution that sets you apart and makes you **UNIQUE**.

TOTAL FREEDOM

uSS can be installed on Linux, macOS, and Windows devices, whether in the cloud, at the edge, or on-premise.

SAVE TIME AND MONEY

Eliminate fixed Windows licensing costs and optimize computing resources with Linux-based systems.

COMPLETE PROTECTION

Continuous updates ensure security and innovation, with full support and pre- and post-sales consulting.

TAILORED SECURITY

uSS is designed to be **fast, reliable**, and **scalable, adapting to your needs** across multiple environments.

With its **modular architecture**, each service (Media Recorder, Live Streamer, etc.) operates independently and can be easily **scaled, transferred, or replicated when needed - in any environment and without opening network ports.**

Thanks to its intuitive web interface, you can manage your security systems **anytime, anywhere.**

USS IS THE INNOVATIVE SOLUTION

It follows you everywhere, from the most challenging architectures to fully **serverless** solutions.

FLEXIBILITY. COMPETITIVITY.
RELIABILITY.

STAND OUT WITH USS
